

SRINIVASAN RAVICHANDRAN

Senior Frontend Developer | React.js Specialist | 5 Years of Experience
Guindy, Chennai 600032 | +91-8668045609 | vasan4649@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Dedicated and detail-oriented Senior Frontend Developer with 5 years of hands-on experience designing, building, and optimizing high-performance, scalable React.js applications across healthcare, SaaS, and enterprise domains. Highly proficient in React.js, TypeScript, JavaScript (ES6+), Redux Toolkit, RTK Query, REST API integration, and modern CSS frameworks. Demonstrated ability to reduce feature delivery time by 20–30% through AI-assisted development tools (GitHub Copilot, Cursor), architect reusable component libraries, and deliver enterprise-grade user interfaces in collaboration with cross-functional teams. Committed to writing clean, maintainable code, improving application performance, and consistently exceeding project quality standards.

CORE COMPETENCIES

React.js • TypeScript • JavaScript (ES6+) • Redux Toolkit • RTK Query • Next.js • HTML5 • CSS3 • Tailwind CSS • Bootstrap • Material UI • Daisy UI • REST API Integration • Node.js • Express.js • MongoDB • Git & GitHub • JIRA • GitHub Copilot • Cursor AI • VS Code • Responsive Web Design • UI/UX Best Practices • Performance Optimization • Unit Testing • Agile / Scrum

VALUES OFFERED

- Application Development & Risk Assessment
- Software Development & Process Optimization
- Project Development, Design Reviews & Code Reviews
- Strong Communication & Team Collaboration

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Coherent Pixels Systems Pvt. Ltd., Chennai (Client: Freshworks)

Aug 2025 – Present

Duration: 11 Months | Current Role

- Architect and deliver scalable, high-performance frontend features for Freshworks' enterprise SaaS platform using React.js and TypeScript.
- Design and maintain reusable, accessible UI component systems that accelerate feature development velocity across multiple product teams.
- Reduce feature delivery time by 20–30% by integrating AI-assisted development tools — GitHub Copilot and Cursor AI — into the daily engineering workflow.
- Enhance debugging efficiency and overall code quality through structured peer code reviews, TypeScript strict-mode adoption, and automated ESLint/Prettier linting.
- Collaborate effectively with cross-functional teams — including design, backend engineering, and QA — to translate complex product requirements into polished, production-ready user interfaces.

Senior Software Engineer | DataTerrain India Private Ltd., Chennai Sep 2024 – Aug 2025

Duration: 1 Year | Past Role

- Designed and implemented scalable frontend architectures for hospital management, mentoring, and volunteer-based web applications using React.js.
- Engineered a multi-tenancy frontend framework with dynamic theming and white-label configuration support across multiple client environments.
- Developed a comprehensive shared component library of reusable React components, reducing redundant code by approximately 35% and accelerating feature delivery.
- Improved bug resolution speed significantly by establishing systematic debugging workflows and documentation practices for complex, interconnected UI systems.
- Applied Redux Toolkit for predictable global state management and RTK Query for efficient API data-fetching, caching, and synchronization.

Senior Software Engineer | Adhanam Infotech Private Limited, Chennai Jan 2022 – Sep 2024

Duration: 2 Years 8 Months | Past Role

- Designed and developed multiple user-centric, fully responsive web applications using React.js, JavaScript, TypeScript, and REST APIs.
- Delivered end-to-end frontend features across a complete suite of healthcare portals — including caretaker, patient, admin, lab, and pharmacy portals — serving thousands of active users.
- Applied UI/UX design principles and accessibility best practices to deliver seamless, intuitive user experiences, consistently reducing user-reported interface defects.
- Integrated real-time audio/video calls and in-app chat functionality using the Agora SDK and Firebase for live push notifications and data synchronization.
- Contributed actively within Agile/Scrum workflows, participating in sprint planning, daily standups, code reviews, and on-time continuous delivery.

ReactJS Developer | Isithora Software Solution, Chennai

Sep 2021 – Dec 2021

Duration: 4 Months | Past Role

- Developed modern, performant web applications using React.js, with a strong emphasis on performance optimization and high-quality user experience.
- Collaborated closely with UI/UX designers to translate design mockups into pixel-perfect, fully responsive React interfaces.
- Implemented Redux for application-wide state management, improving application stability, maintainability, and predictability.

NOTABLE PROJECTS

Diahome Caretaker Web | React.js, Bootstrap, Material UI

- Built a telemedicine web application enabling doctors to conduct real-time consultations with patients, supporting over 1,000 active users.
- Designed a fully responsive, cross-device-compatible UI using React.js, HTML5, CSS3, Bootstrap, and Material UI.
- Integrated real-time audio/video calling and in-app chat functionality using the Agora SDK for seamless doctor-patient communication.

Diahome Patient Web App | React.js, Firebase

- Developed a patient-facing React.js application supporting online consultation booking, lab test scheduling, and appointment management.
- Integrated Firebase for real-time push notifications and live data synchronization, improving the appointment tracking experience.
- Implemented audio/video calling and in-app chat using the Agora SDK, enabling end-to-end virtual consultation workflows.

Mentoring Platform | React.js, Redux Toolkit, Material UI

- Developed a feature-rich web platform facilitating structured mentor-mentee collaboration, session scheduling, and progress tracking.
- Managed complex application state using Redux Toolkit, enabling dynamic rendering of scheduling, profile management, and session tracking modules.
- Designed accessible, fully responsive Material UI components for a consistent cross-device user experience.

Hospital Management System | React.js, Redux Toolkit, Material UI

- Built comprehensive web modules for patient admissions, appointment scheduling, and hospital staff operations management.
- Integrated REST APIs for real-time patient record and hospital data synchronization, reducing manual data entry overhead.
- Delivered a responsive, user-friendly UI/UX optimized for clinical staff usability across desktop and tablet devices.

Workbox — Organizational Management App | React.js, Bootstrap

- Developed a full-featured internal management application with modules for leave management, employee records, and task assignment.
- Integrated real-time team messaging using Socket.IO, enabling instant communication across departments and reducing email dependency.
- Built a responsive, intuitive UI using React.js, HTML5, CSS3, Bootstrap, and Material UI to enhance overall employee experience.

Diahome Admin Portal | React.js

- Built a robust, role-based admin portal for employee profile management, access control, and location-based consultation fee configuration.
- Developed appointment slot management, staff attendance tracking, and leave management modules to streamline HR and operational workflows.
- Created interactive KPI dashboard charts providing real-time performance insights to support data-driven administrative decision-making.

Diahome Lab Portal | React.js

- Developed a comprehensive lab management portal supporting creation and administration of internal and external labs, test packages, and test-package mappings.
- Implemented a pincode-based priority routing engine for optimized resource allocation and faster order fulfillment across service regions.
- Built a real-time order management system with manual status updates, automated user notifications, and detailed test report generation on completion.

Diahome Pharmacy Portal | React.js

- Developed a full-featured pharmacy management portal encompassing pharmacy, vendor, warehouse, and drug master record management.
- Built a purchase order system enabling pharmacies to create, track, and manage vendor drug procurement, significantly improving inventory control.
- Streamlined patient order management workflows and designed an accessible, intuitive user interface optimized for daily pharmacy operations.

EDUCATION

Bachelor of Computer Applications (BCA) | Sir Issac Newton College, Nagapattinam | 2020

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux Toolkit, RTK Query, Bootstrap, Material UI, Tailwind CSS, Daisy UI

Backend & Database: Node.js, Express.js, MongoDB

Tools & Platforms: Git, GitHub, VS Code, JIRA, GitHub Copilot, Cursor AI, Firebase

Operating System: Windows

LANGUAGES

English — Fluent | **Tamil** — Native
